Furthermore, made it obligatory on the citizens to live under the shadow of prosperity and kindness with each other, the rich have to help the vulnerable people, the elders have to show mercy to the younger ones and the younger ones to respect the elders. It should not be like that, one person eats food on a full stomach and next to him, another person spends days and nights hungry, by doing such action, social fairness and justice will be demolished and Allah Almighty becomes very sad. Those people who live a comfortable and peaceful life and do not care regarding the condition of the vulnerable people; There is no doubt that they are deprived of the mercy of Allah Almighty and the intercession of Muhammad pbuh. Therefore, according to the above-mentioned principles and guidelines, it is necessary for the rich and wealthy citizens to reach out the vulnerable and poor people. To fulfill this duty, it is not important to reach the quorum, but it is important that if we have sufficient food for a day and night and see that a vulnerable person or an orphan, who passes the day and night hunger; Provide them something, because it is the responsibility of every human being and Muslim; To be responsible to his fellow-creature. The feeling and sensitivity of humanity is the guarantor of social well-being, every human being endeavors; To help another person who is in trouble and he feels that one of his body part is painful and should be treated as soon as possible. The people of Afghanistan have been facing problems and sufferings for several decades and are still suffering of them, the latest example is the series of earthquakes and floods in the current year, which killed many citizens and destroyed houses, lands and fields, which severely affected the economy. As the society is in a bad situation/condition of life and the level of need of the vulnerable and poor is so high; Therefore, it is necessary for the wealthy Afghans and zealous nation; To put hands for humanity and pass this divine test and great human challenge successfully.
